Working Experience

HUAWEI March 2023 – Present
Industrial PhD Candidate *Germany*
- Conducting projects and research in trustworthy AI, privacy preservation, and biometric data security.
- Investigating industrial applications of trustworthy in generative models and AI agent.
- Publishing research papers in international conferences.

Laboratoire Hubert Curien Jan. 2022 – Aug. 2022
Master Thesis Research Intern *France*
- Investigated illumination spectral power distribution (SPD) estimation.
- Implemented a modified image signal processing (ISP) pipeline for modeling sensor imaging.
- Proposed 1D-CNN models for illumination estimation to predict lighting conditions in unknown scenarios.

Mihaly June 2021 – July 2021
3D Printing Research Intern *France*
- Achieved human skin-like glossiness using OpenCV to implement the algorithm and a CMYK printer for 3D printing.
- Developed an algorithm to simulate image glossiness for 3D human skin microstructure printing.

Education

Friedrich Schiller University Jena 2023 – Present
PhD in Privacy-Preserving Computer Vision (Funded by HUAWEI) *Germany*
- **Thesis Supervisor:** Prof. Joachim Denzler.

Erasmus Mundus Joint Master Degrees Program 2020 – 2022
M.Sc. in Computational Colour and Spectral Imaging (COSI) *Norway, Spain, Finland, France*
- **Institutions:**
  Norwegian University of Science and Technology (NTNU), University of Granada, University of Eastern Finland
- Awarded full scholarship (**49,000** euros).
- Obtained triple master degrees.
- **Thesis:** Deep Learning-Based Illumination SPD Estimation from an RGB Camera.

Dalian University 2016 – 2020
B.Sc. in Optoelectronic Information Science and Engineering *Dalian, China*
- **Overall GPA:** 87/100.
- **Thesis:** Research on Optical Properties of Bimetal Nanospheres.

Projects and Research

Research project on Face Image Reconstruction via Diffusion Models | *Huawei (Germany)*
- Reconstructed complete, high-fidelity facial images from facial feature embeddings.
- Implemented Kolmogorov-Arnold Networks (KAN) adapter to ID-preservation generation model for reconstruction.
- Increased attack success rates while cutting training time and memory versus GAN models.

Research project on Machine Unlearning of Text-to-Image Models | *Huawei (Germany)*
- Mitigated the generation of NSFW content and copyright content in text-to-image (T2I) models.
- Proposed an RL-based LoRA fine-tuning technique with modified cross-attention to erase target concepts.
- Outperformed SOTA models in concepts erasing, with high generalizability to Image-to-Image (I2I) tasks.

Research project on Facial Privacy Protection based on Diffusion Models | *Huawei (Germany)*
- Protected user's facial privacy of public photos poseted on social media against unauthorized recognition.
- Developed a training-free facial privacy protection method manipulating diffusion model sampling processes
- Surpassed SOTAs against commercial recognition APIs while maintaining image naturalness with rapid generation.

Research project on Privacy-Preserving Face Recognition | *Huawei (Germany)*
- Protected sensitive facial data for secure multi-party face recognition systems.
- Proposed a fusion method for frequency and color information to reduce channel dimensionality.
- Validated system robustness against advanced reconstructive attacks using UNet and GAN restoration models.

Selected Publications

Han, Dong, et al. "ForceForget: Reinforcement Concept Removal for Enhancing Safety in Text-to-Image Models." *Proceedings of the 43nd International Conference on Machine Learning (**ICML**)*. 2026.

Han, Dong, et al. "Realistic Face Reconstruction from Facial Embeddings via Diffusion Models." *Proceedings of the AAAI Conference on Artificial Intelligence (**AAAI**)*. 2026.

Han, Dong, et al. "Diffusion-based Identity-Preserving Facial Privacy Protection." *IEEE International Conference on Acoustics, Speech and Signal Processing (**ICASSP**)*. 2025.

Han, Dong, et al. "Robust skin color driven privacy-preserving face recognition via function secret sharing." *IEEE International Conference on Image Processing (**ICIP**)*. 2024.

Han, Dong, et al. "Privacy-Preserving Face Recognition in Hybrid Frequency-Color Domain." *Proceedings of the 19th International Joint Conference on Computer Vision, Imaging and Computer Graphics Theory and Applications (**VISAPP**)*. 2024.

Technical Skills

Programming Languages: Python, R, C++
Softwares/Frameworks: PyTorch, OpenCV, TensorFlow, Keras, Scikit-Learn, Git, MATLAB, LaTeX
Languages: Chinese (Native), English (Fluent), German (A2)

Awards & Academic Service

Huawei Rising Star (2025)

Erasmus Mundus Master Scholarship (Top 60 selected in China) (2020)

First Prize of Photoelectric Design Competition (Object recognition from speckle image) (2019)

WangTeng Scholarship of Physics Faculty (For outstanding performance in math and physics) (2018)

Best Student (Top 8% at faculty) (2018)

Conference Reviewer

- European Conference on Machine Learning and Principles and Practice of Knowledge Discovery in Databases (ECMLPKDD 2024-2026)
- International Conference on Acoustics, Speech and Signal Processing (ICASSP 2026)
- International Conference on Machine Learning (ICML 2026)

Journal Reviewer

- International Journal of Computer Vision (IJCV 2026)
